

Stability Summary

Product group: Biopharma
 Brand name: BioHale® Sucrose
 Product description: Sucrose low endotoxin grade
 Document No.: PD-o840 Page 1 of 8

1. Stability Statement

DFE Pharma has defined a shelf life for all of its products based on a stability testing program conforming to IPEC Excipient Stability Program Guide 2022.

DFE Pharma guarantees that its products comply with all specifications up until the end of their shelf life period (the expiry date), when stored in the original unopened packaging. For BioHale® Sucrose the established shelf life is 48 months.

There is no special controlled storage condition required. Our recommendation is to store the product in its original unopened pack at room temperature (normal warehouse conditions) and allowing temporary excursions from these conditions. This recommendation is supported by our stability studies under controlled ICH conditions covering both physical/chemical and microbiological attributes. Our experience of many years as supplier of excipients to customers all over the world including humid and hot regions confirms that our products are stable during storage and transport.

2. Materials and Methods

DFE-Pharma conducts a stability program conforming IPEC Excipients Stability Program Guide 2022 for supporting the stability of its products. Three batches of BioHale® Sucrose, produced in The Netherlands, have been stability tested under ICH long term and accelerated conditions (Table 1). As these represent the initial three batches for DFE-Pharma an extended stability program was implemented.

Table 1: Overview of batches BioHale® Sucrose (small packs)

Batch	Prod. date	Stability start	Duration of data (months) at		
			25/60	30/65	40/75
2103008.2075	Mar 21	Mar 21	48	48	6
2103009.2075	Mar 21	Mar 21	48	48	6
2103011.2075	Mar 21	Mar 21	48	48	6

3. Packaging and storage

The stability batches were enclosed in low-density polyethylene (LDPE) bags, each containing approximately 100 g of Sucrose. The bags were subsequently packed into a 300 ml high-density polyethylene (HDPE) drum, which shares the same material composition and wall thickness as commercial drums (available in 20 kg or 1 kg size), thereby representative for these packs. The closed drums were stored under controlled conditions at 25°C/60%RH (25/60), 30°C/65%RH (30/65) and 40°C/75%RH (40/75).

At each scheduled time point the batches were analyzed for selected tests from the product specification using the specified analytical methods. The selected tests are those deemed relevant to potential chemical, functional and microbiological product acceptability.

4. Results and Discussion

The 48 months data of the three conditions show that all Sucrose tests are within specification for all conditions, with the exception of an unexpected endotoxin failure at 48 months at 25/60. No root cause was found, a reserve sample of 48 months at 25/60 also failed to meet the specification. All other tested timepoints and microbiological results are passing, including 48 months at 30/65 and 6 months at 40/75.

During the studies at 30/65 and 40/75, Sucrose is exposed to more stressful conditions (higher temperature and higher relative humidity) compared to the study at 25/60. The hypothesis is that the root cause is related to the worst case scenario of small packages and/or laboratory proceedings, which increases the risk of contamination. With all other microbiological tests passing, endotoxin level will not increase. This anomaly is considered an incident, particularly as the pack at the intermediate temperature (30/65) meet the requirements for all timepoints, as well as the microbiological tests. Sucrose has a low moisture content and is stored in a highly protective drum, mitigating the risk of water uptake and microbial growth.

All tests that are stability indicating (clarity of solution, color value, loss on drying, assay and impurities) are all compliant under all conditions at all time points. There are also no trends visible in the test results of these parameters, which shows that the product is stable for a minimum of 48 months.

To exemplify the results of the batches are shown in addendum 1 to 6.

5. Conclusion

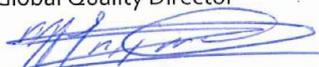

The totality of data of BioHale® Sucrose support a product shelf life of 48 months.

Retest Date

The expiry date as documented on the product and the corresponding Certificate of Analysis is generated as follows:

Retest date = (Production date) + (shelf life in months) – (one month).

We trust this information which is made up to the best of our knowledge will be helpful to you.

Total impurities	max 2,0%	<0,1%	<0,1	<0,1	<0,1	<0,1	<0,1	<0,1	<0,1	0,1	0,1	<0,1
Residual solvents Methanol	max 300 ppm	151	--	--	--	--	--	--	--	--	--	137
Residual solvents Acetone	max 900 ppm	543	--	--	--	--	--	--	--	--	--	337
Assay	98,0-102,0%	99,6	99,8	100,2	100,5	98,5	100,0	99,7	99,7	101,3	99,4	99,5
Bacterial endotoxins	max 0,25 EU/g	pass	pass	pass	pass	--	--	--	--	--	--	fail
TAMC	max 10 CFU/g	<10	--	--	--	--	--	<10	--	<10	<10	<10
TYMC	max 10 CFU/g	<10	--	--	--	--	--	<10	--	<10	<10	<10
Staphylococcus aureus	negative in 10g	negative	--	--	--	--	--	negative	--	negative	negative	negative
Salmonella	negative in 10g	negative	--	--	--	--	--	negative	--	negative	negative	negative
E. coli	negative in 10g	negative	--	--	--	--	--	negative	--	negative	negative	negative
Pseudomonas Aeruginosa	negative in 10g	negative	--	--	--	--	--	negative	--	negative	negative	negative

Stability Summary

Product group: Biopharma
 Brand name: BioHale® Sucrose
 Product description: Sucrose low endotoxin grade
 Document No.: PD-0840 Page 8 of 8

Addendum 6: Stability Data Sucrose batch 2103011.2075 at 30/65 and 40/75

Product:	Biohale® Sucrose		Batch:	2103011.2075				Packaging:	Small pack (ca 100g in 1dpe bag in drum 300ml)							
Article Code:	1178771		Production date:	Mar-2021				Start stability study:	Mar-2021							
Test	Specification	months at 30°C/65%RH										months at 40°C/75%RH				
		0	1	2	3	6	9	12	18	24	36	48	1	2	3	6
Identification (IR)	complies	pass	--	--	--	--	--	--	--	--	--	pass	--	--	pass	pass
Identification Cupric tartrate	complies	pass	--	--	--	--	--	--	--	--	--	pass	--	--	pass	pass
Clarity of solution	clear	pass	pass	pass	pass	pass	pass	pass	pass	pass	pass	pass	pass	pass	pass	pass
Color value	max 10	1	4	4	4	3	4	4	4	3	4	4	4	4	4	3
Color value (ChP)	≤ Y4	pass	pass	pass	pass	pass	pass	pass	pass	pass	pass	pass	pass	pass	pass	pass
Conductivity	max 5 µs/cm	1	--	--	--	--	--	--	--	--	--	1	--	--	1	1
Specific optical rotation	66,3 - 67,0	66,6	--	--	--	--	--	--	--	--	--	66,6	--	--	66,5	66,7
Dextrins	complies	pass	--	--	--	--	--	--	--	--	--	pass	--	--	pass	pass
Reducing sugars	complies	pass	--	--	--	--	--	--	--	--	--	pass	--	--	pass	pass
Sulfites	max 10 ppm	pass	--	--	--	--	--	--	--	--	--	pass	--	--	pass	pass
Sulfate	max 60 ppm	pass	--	--	--	--	--	--	--	--	--	pass	--	--	pass	pass
Residue on ignition	max 0,05%	0,00	--	--	--	--	--	--	--	--	--	<0,01	--	--	0,00	0,00
Calcium	max 0,03%	pass	--	--	--	--	--	--	--	--	--	pass	--	--	pass	pass
Heavy metals	max 5 ppm	pass	--	--	--	--	--	--	--	--	--	pass	--	--	pass	pass
Loss on drying	max 0,1%	0,1	0,1	0,1	0,1	0,1	0,1	0,1	0,1	0,1	0,1	0,1	0,1	0,1	0,1	0,1
